Bachelor of Science in Information Technology — Graduation Date: Jul 2025

WORK EXPERIENCE

Bluebeans Systems Inc. — Sibulan, Negros Oriental, Philippines
Full Stack Web Development Intern — March 2025 – June 2025

- Engineered and deployed core backend modules in Laravel for OFARM, an AI-driven agriculture platform, enabling precise farm mapping and dynamic pricing algorithms, resulting in a functional MVP showcased at national and regional startup events.
- Designed responsive React + Inertia.js frontends, enhancing platform usability for non-technical users.
- Managed MySQL database schemas and implemented geospatial farm mapping with Leaflet.js.

PROJECTS

OFARM – OnlyFood Agriculture Research & Marketing System (Laravel, React, AI Integration, Leaflet.js)

- Contributed as full-stack intern to the development of the MVP (backend modules, farm mapping, automated pricing).
- Integrated geospatial farm mapping and automated pricing algorithms, showcased at national startup events.

Private File Hosting Platform with VPN Security (Laravel, React, LEMP Stack, Tailscale)

- Created a self-hosted secure cloud storage solution with file encryption and VPN-based restricted access.
- Deployed on Ubuntu VPS with custom LEMP stack for personal and secure file sharing.

Vehicle Maintenance Management System (Laravel, React, PWA)

- Developed an appointment scheduler, service logs, and notification system for a local auto clinic.
- Integrated PWA functionality for real-time updates and offline access.
